SUMMARY

B.E. Computer Science engineer (CGPA 8.53) with Python, FastAPI, and React experience — built AI-integrated full-stack apps including a real-time voice AI assistant with LLM and WebSocket integration.

EXPERIENCE

Machine Learning Intern

Malaris Software Solutions
June 2025 - July 2025

- Built and evaluated machine learning models using Scikit-learn, Pandas, and NumPy on real-world datasets.
- Applied data preprocessing and feature engineering to improve model input quality.
- Gained hands-on exposure to industry ML tooling and end-to-end model workflows.

Python Development Intern

Aescion Edtech Solutions
March 2026 - April 2026

- Built AI automation workflows using n8n and Python for real-time application management.
- Developed and deployed Python web applications end to end.
- Explored AI-powered automation tools to streamline business workflows.

EDUCATION

B.E., Computer Science & Engineering

Thamirabharani Engineering College
2023 - 2026
CGPA: 8.53/10

Diploma, Computer Science & Engineering

Sankar Polytechnic College
2020 - 2023
99.54%

PROJECTS

Voice AI Assistant

FastAPI, WebSockets, Flutter
Built a voice AI assistant with a FastAPI backend and WebSockets, integrating Whisper, Ollama/Llama 3, and Supabase for real-time conversational AI.

Crime Record Management System

Built a full-stack web platform connecting citizens, police stations, and administration using PHP and MySQL.

CERTIFICATIONS

Red Hat System Administration

Red Hat
Python 101 for Data Science — IBM

- HTML5 & CSS3 Complete Course – Udemy
- C Programming – Sololearn
- NCC 'B' and 'C' Certificate holder
